for DevOps Leader roles from
Sumo Logic Academy

DevOps Leader Learning Path

DevOps Leader Learning Path

This guide lays out the recommended Sumo Logic Academy course sequence for DevOps Leaders. It starts with onboarding and moves through security logs, metrics, and observability administration.

► **Recommended:** take this path step-by-step in the Sumo Logic Learning Portal — [DevOps Leader Learning Path](#)

⚠ **Before you begin:** the guided path above and the self-paced course links below both require signing in to the Sumo Logic Learning Hub.

[View sign-in instructions](#)

Core learning path

Phase	Focus	Courses	Time
1. Foundation	Platform basics	Fundamentals	~3 hrs
2. Operational Maturity	Dojo AI & search	Hands on with Mobot and Dojo AI, Search Mastery	~4 hrs
3. Advanced	Security logs, metrics, observability admin, extensibility	Logs for Security, Metrics Analytics, Observability Administration, Extending Sumo Logic with MCP/API/Terraform	~9 hrs

Phase 1 Foundation

Platform basics before anything role-specific.

Fundamentals

Basic concepts: metadata, data types, dashboards, apps. Includes hands-on labs.

Free live instructor-led class: [Register here](#) · [Watch recording](#) · ~3 hrs

Free self-paced course: [Access course](#) · ~3 hrs

Target role: All Sumo Logic users

Phase 2 Operational Maturity

Getting productive with Mobot and search.

Hands on with Mobot and Dojo AI

Mobot's core functionality and business value; writing effective prompts; best practices for using Mobot efficiently.

Free live instructor-led class: [Register here](#) · [Watch recording](#) · ~1 hr

Free self-paced course: [Access course](#) · ~1 hr

Target role: *All Sumo Logic users*

Search Mastery

Advanced log operators, analytical functions, efficient queries, dashboards, alerts.

Free live instructor-led class: [Register here](#) · [Watch recording](#) · ~3 hrs

Free self-paced course: [Access course](#) · ~3 hrs

Target role: *Analysts, Admins who write queries*

Phase 3 Advanced

Security logs, metrics, observability administration, and platform extensibility.

Logs for Security

Use Logs for Security & Threat Intelligence; query AWS data; hunt for threats; build SOC dashboards.

Free live instructor-led class: [Register here](#) · [Watch recording](#) · ~3 hrs

Free self-paced course: [Access course](#) · ~2 hrs

Target role: *SOC Analysts*

Metrics Analytics

Collect and analyze metrics; unified Logs and Metrics solution; hands-on labs.

Free live instructor-led class: [Register here](#) · [Watch recording](#) · ~3 hrs

Free self-paced course: [Access course](#) · ~2–3 hrs

Target role: *Admins, Analysts*

Observability Administration

Set up Sumo Collection on Kubernetes; OpenTelemetry collectors; Reliability Management / SLOs.

Free self-paced course: [Access course](#) · ~3 hrs

Target role: *Admins, DevOps*

Extending Sumo Logic with MCP/API/Terraform

Learn ways to extend Sumo Logic platform functionality through MCP, Terraform, or API commands.

Free self-paced course: [Access course](#) · ~1–2 hrs

Target role: *All Sumo Logic users interested in extending the platform via MCP*

Certification Prove It

Once the courses above are complete — and with roughly six months of hands-on product experience — these exams are directly relevant to this role:

- **Fundamentals Exam** — \$100, no prerequisite. Leads to the Sumo Logic Certified Fundamentals User credential.
- **Search Mastery Exam** — \$150, requires Fundamentals. Leads to the Sumo Logic Certified Search Mastery User credential.
- **Logs For Security Exam** — \$150, requires Fundamentals. Leads to the Sumo Logic Certified Logs for Security Analyst credential.
- **Metrics Analytics Exam** — \$150, requires Fundamentals. Leads to the Sumo Logic Certified Metrics Analyst credential.

Kryterion proctors every exam. Certifications stay valid for two years and award a Credly digital badge upon passing.

Metrics Analytics badge

Optional resources

Supplementary content for deeper exploration and self-directed learners.

Optional self-paced courses

- [The Sumo Security Pipeline](#) — overview of Sumo Logic's security tools: CIP, Cloud SIEM, Cloud SOAR (~1 hr)
- [Kubernetes on Sumo Logic Self-Paced](#) — monitor and troubleshoot Kubernetes using logs, metrics, and traces (~2 hrs)

Microlessons — Metrics/Observability

- [Introduction to Metrics](#) (4:50 min)
- [Introduction to Observability Solution](#) (7:16 min)

Microlessons — Security

- [Cloud Infrastructure Security for AWS](#) (3:36 min)

Expert sessions

- [Reduce MTTD+MTTR and Improve User Experience with Observability](#)
- [Threat Detection & Hunting with Sumo Logic](#)
