## Intelligence gaps curbing Retailers' climb to digital success

As businesses embrace digital transformation, their journeys become difficult when encountering new obstacles from navigating cloud and modern application technologies. These obstacles create intelligence gaps if not addressed, threatening the reliability and security of digital services.

Sumo Logic Continuous Intelligence Platform™ provides real-time analytics as a true SaaS across multiple use cases to speed DevSecOps & business decision-making to drive reliable, secure and engaging customer experiences.

### Summit with Sumo Logic

Manage the volume and velocity of your data and transform it into **game changing insights**.

Enable all functions to operate and collaborate with contextual insights from a single source of truth **for faster, smarter decisions**.

Speed threat detection and response, and **filter the real threats** from the noise across an ever-expanding surface area of attack.

Leverage a **single pane of visibility** across heterogenous environments in real-time, and across multiple use cases.

**Speed quality software improvements**, and better manage these complex systems and services.

Data deluge **5**

**4** Whose data is right?

Perimeter-less security **3**
